Yokogawa Temperature Sensor Solutions

Thank you for all your efforts in the sales and promotion of all our transmitters and associated products

We are pleased to announce the publication of our much anticipated Yokogawa Temperature solutions General specification (GS 09S01-E-E)
The GS is a complete guide to the selection of Yokogawa Temperature Sensors

The GS was developed in conjunction with WIKA Germany, all part numbers, prices and logistics from WIKA are included in our SAP system for simplified cost effective quoting and ordering.

Although, we have a SAP solution with WIKA, this GS is an impartial document, the part structure is exclusive to Yokogawa, this allows our customers and our temperature solution partners an understanding of our temperature sensor offering.

During the coming months we will be arranging comprehensive training and on going support in all aspects of Yokogawa's Temperature Sensing Solutions, with the ultimate goal of confidently selling our temperature solutions to our customers.

Our new Temperature Solutions General specification is already available on our IA Marketing Intranet site

[Sensors and thermowells](#)

Temperature Sensor Solutions are an important addition to our Instrumentation portfolio, 3rd party alliances represent almost 25% of our current order intake; Temperature Sensors solutions are already an essential part of our order value, with the potential to add further growth within this segment,

Kind Regards
Russell Hobbs
